PRESS RELEASE

THE NEW VIBRACHECK FLEXXTECH STABILIZER REVOLUTIONISING VIBRATION CONTROL

Tucson, AZ – Vibracheck, a division of Precision Shooting Equipment, Inc., manufacturer of high quality archery equipment, announces the introduction of the new Flexxtech™ stabilizer.

The Flexxtech™ stabilizer by Vibracheck is designed to reduce a broad spectrum of vibrations in one compact, affordable unit. Each VibaSORB ring is engineered and sized to dampen specific frequencies of sound and range of bow vibration. The tapered core, combined with the damping rings, gives the Flexxtech™ 360 degrees of motion. In addition, the innovative 5-inch design produces an "accordion effect" equipped to handle whatever kick and vibration your bow puts out. From the harshest speed bow to your indoor target rig, the Flexxtech™ stabilizer will improve your bow's feel on every shot.

The Flexxtech™ stabilizer uses Vibracheck's ultrasoft VibaSORB rubber and is available in camouflage or black.

"While the basic design of the Flexxtech stabilizer appears simple, there is a lot of engineering and research that went into it," said Vibracheck engineer David Kronengold. "It will eliminate vibration and quiets any bow."

For more information on the Flexxtech™ stabilizer from Vibracheck, please visit the PSE website online at www.pse-archery.com or contact Precision Shooting Equipment, Inc. at (520) 884-9065.
