PRESS RELEASE

PSE SETTING THE INDUSTRY STANDARD FOR THE SECOND YEAR IN A ROW WITH THE NEW X FORCE TS

Tucson, AZ - Precision Shooting Equipment, Inc., manufacturer of high quality archery equipment, announces the introduction of the new X Force™ TS Compound Bow.

Need speed in a compact and affordable package? The new PSE Archery, X Force™ TS compound bow uses the revolutionary new X technology to produce a bow designed with the specific needs of the white-tailed deer hunter in mind.

Built using the same 12-inch limbs and Hybrid Fast cams as the revolutionary X Force, the X Force TS is a compact 28-inch axle-to-axle bow design that is ideal for hunting from a treestand. The X Force TS features an extremely quiet, vibration free operation, a very forgiving 7-inch brace height and an IBO speed of 330 fps. All the combined features of the X Force TS make it one of the best all around hunting bows on the market.

"The obvious difference in this bow and the original X Force is the compact design," said PSE founder and legendary bowhunter, Pete Shepley. "We designed it specifically for tree stand hunters, but it is perfect for any hunter looking for a compact hunting bow that is incredibly accurate and easy to shoot."

The foundation for the X Force TS is the new "Hybrid Fast" HF Cam system featuring an oversized cam design and aggressive draw force curve for maximum energy storage and power stroke. Let-off on this new fast cam is adjustable from 70% to 60%. The new "Hybrid Fast" cam system uses the same modules as PSE's popular NRG™ Hybrid cam system for a draw length range of 26 to 30 inches.

Building for maneuverability, the PSE Engineers created a reflexed, fully machined riser with an aggressive limb pocket angle and past parallel limb design. The X Force™ TS riser has quick setup reference marks, multiple sight mounting holes to make setting up your X Force™ TS almost as fast as the bow itself. Additional features include a new slimmer wood grip, eight factory installed Vibracheck vibration dampening devices, a mass weight of 3.8 pounds, a 7-inch brace height, available in left or right hand in both 60 and 70 pound options, and fully dipped in Mossy Oak® NEW Break-Up® Camo.

If you thought you had to sacrifice accuracy and speed for a compact hunting bow, THINK AGAIN!
