

STRAIGHTER AND STRONGER! WHAT ARE YOU LOOKING FOR IN AN ARROW?

NO HYPE, NO GIMMICKS, JUST THE STRAIGHTEST AND STRONGEST CARBON ARROWS ON THE MARKET.

At Carbon Force™ we don't look for gimmicks to sell arrows. We don't attach rubber to our inserts and we don't come up with bogus algebra formulas to make it look like our arrows penetrate better. We simply use a better process to make arrows that are straighter and stronger than any arrow on the market.

It's a fact... a straighter arrow is more accurate and a stronger arrow performs better on game. So how do we do it? Carbon Force uses a computer-controlled process that wraps carbon fibers at various angles to form the arrow shaft. The result is a woven pattern of graphite fibers - and a shaft that is almost 30% stronger and consistently straighter than conventional carbon arrow shafts. Carbon Force™ Radial X Weave™ - simply the finest arrows on the planet today.
